

Session #1 – WG#2 - Data Access (Eng) Room #2

➤ Current situation regarding the on-line pull data services

- EUMETView:
 - Importance for the users who have station problems (antenna or computers)
 There users & countries who use the service regularly
 - Other Daily use cases
- Data Store & Tailor:
 - Possibility to automatically download MSG data in NRT via the store and tailor
- - Training needs for the pull data services (training.eumetsat.int)

Data Access (Eng) Room #2 (Continued)

➤ Interest / challenges / awareness regarding EUMETCast Terrestrial

- Some NRENs may require more info about the Terrestrial
 - Technical requirement for NREN (multicast support)
 - Administrative steps for Met Services to get connected to NREN
- High last-mile connection costs
- JRC has already connected to Terrestrial Service and has satisfactory performance
