

Recommendations from 16th EUMETSAT User Forum in Africa

Hervé Trebossen

16-EUFA : 14 recommendations

Topic	Closed	On-going	Open
Data access and Training - recommendations #1 to #3		#1, #2 and #3	
AMSAF	#4, #6	#5	
Climate and Air Quality monitoring	#7, #10, #11		#8, #9
EO for Hydrology		#12, #13	
Blue economy	#14		

Report from past EUFA session : <https://www.eumetsat.int/media/52476>

#1 - PUMA-2025 and ClimSA Stations Deployment: Deployment **on-going**, more information during Session #2 this afternoon

#2 - PUMA-2025 and ClimSA Stations Training: **On-going**, more information about content and schedule during session #2

#3 - EUMETCast -Terrestrial and EUMETView: **On-going.** SAWS, RCMRD already connected, Mauritius Meteorological Services commissioned a terrestrial link in 2025, GMet is actually testing his Terrestrial connection

Establishment of regional AMSAF-Nowcasting #4 (closed) and #5 (on-going):

Establishment of AMSAF-NWC has started and engagement within each region will begin soon -> *more information **Session #4** (Thu afternoon)*

#6 – MyDewetra and Situation Rooms: On-going. CIMAF Foundation confirmed integration of MTG products into myDewetra is underway (H-SAF snow, instantaneous and accumulated precipitation products).

#7 – Cotonou Declaration: Closed. Follow-up activities organized in Dec 2025. Joint Working Group to be established and operationalised by AUC, in cooperation with RECs and AMCOMET, with support from EUMETSAT.

#8 – Training on Air Quality monitoring: Open. Capacity-building needs confirmed. JWG under Cotonou Declaration expected to coordinate training activities.

#9 – CM-SAF integration into ClimSA Station: Open. Not yet integrated; may be revisited in context of ClimSA/Africa Knowledge Platform integration.

#10 – Sub-seasonal climate services: Closed. ArcX Climate programme led by ECMWF will advance sub-seasonal forecasting capabilities at African RCCs.

#11 – Climate Agrometeorology: Closed. Regular ClimSA software updates, H-SAF/TAMSAT training materials promoted, C3S Climate Data Store available via ClimSA stations -> *more information during Session #3 (Thu morning)*.

*Specific sessions dedicated to **Climate and Air Quality monitoring** during the 17-EUFA Plenary sessions in Eswatini 5-9 October*

- #12 – Transition to MTG for Water Basin Authorities: On-going.** Several RBOs have initiated operational use of hydrological models integrating MTG-based satellite precipitation products since 2024.
- #13 – Training and Cal/Val for EO Hydrology: On-going.** Training webinars and sessions organized by EUMETSAT/H-SAF in 2025 (100+ African participants). E-learning platform for H-SAF products launched.
- #14 – GMES & Africa Marine and Coastal Services: Closed.** MarCNoWA and MarCOSIO consortia established regular coordination; cross-fertilization activities harmonised EO-based coastal/marine services across both regions.

THANK YOU FOR YOUR ATTENTION!
